

## Writing in Engineering and Science

The following resources are tailored for engineering and science students:

- **Technical writing** - Conventions to help students with the main features or technical writing used by scientists and engineers.
- **Lab reports** - Guide for undergraduate science, technology and engineering students examines a simple and an extended report.
- **Honours thesis** - Structure, writing tools and answers to frequently asked questions.
- **Report writing** - Questions you might need answered before getting started on your report and an outline of basic report sections.
- **Case study report in (engineering)** - This is a case study report in risk management but may be useful for students writing a case study in engineering.

### **iWRITE**

The Learning Centre and the faculties of Engineering and Science have developed a large suite of writing resources for science and engineering genres. These resources are located in the **UNSW iWRITE** site. In **iWRITE**, students will find a number of tutorials to help them write the engineering assignments of the undergraduate years.

For further information on this resource, contact Ms Pam Mort ([p.mort@unsw.edu.au](mailto:p.mort@unsw.edu.au))

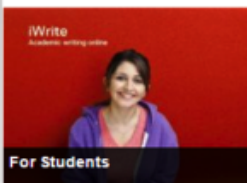

### Welcome to iWrite

#### IWRITE FOR STUDENTS:

iWrite will help you write different engineering and science assignments  
iWrite will help you improve your marks

#### IWRITE FOR LECTURERS:

iWrite will help you to reduce your marking time  
iWrite will help you in giving feedback to your students

## WRISE

We also recommend using the [Write Reports in Science and Engineering \(WRISE\)](#), an online learning environment for students who are writing reports in science and engineering.
