During the morning and afternoon peak periods, delays are being experienced along Botany Street travelling to and from UNSW. UNSW management are aware of these delays and are liaising directly with Transport for NSW to have this issue resolved quickly.

The Transport Management Centre and Roads and Maritime Services are working to resolve the phasing of the traffic signals at the High St and Botany St intersection as a matter of urgency, as this is contributing to the traffic congestion impacting UNSW express bus services and UNSW operations.

We apologise for any inconvenience this is causing and UNSW is working to resolve the issue as quickly as possible.

For further information or to provide feedback or submit a complaint, UNSW students and staff can contact Transport for NSW on: Infoline 1800 684 490 or projects@transport.nsw.gov.au.
