Volunteering is an excellent way to give back to your community while making new friends and gaining confidence in working towards something meaningful. You can also gain experience in your field of study or explore other areas of interest while developing valuable skills in leadership, teamwork, problem-solving and communication. These skills are highly transferable to the workplace and will enhance your employability.

Many of our volunteering opportunities are accredited by UNSW Advantage and eligible for recognition on your Australian Higher Education Graduation Statement (AHEGS). You can also access volunteer opportunities by logging in to the Careers portal which is updated daily with hundreds of opportunities.
