Amounts are per unit of credit (UOC). Students are charged based on their student status (domestic or international) and the classification of the course (undergraduate, postgraduate or research), also known as the course career or study level of the course. To calculate the fee for a course refer to the course prefix (e.g. AERO) and the course classification (e.g. Postgraduate), then multiply by the UOC value of the course, available from the Handbook.

**Example:** A domestic postgraduate student is enrolling in an Engineering course, AERO9500, which has a value of 6 UOC and the course is classified as postgraduate. The fee for this course will be $725 \times 6 = $4350.

</table>

**Note**

The table above shows indicative tuition fee amounts for 2019 for Domestic full fee-paying students.

The fees listed on this table are in Australian dollars (AUD). Tuition fees are reviewed annually and may increase each year. Students are charged tuition at the rate corresponding to the year of the Census date applicable to their enrolment in a course. The University of New South Wales makes every attempt to ensure that all information is current. However, the University reserves the right to amend any or all of the information above without notice in response to changing circumstances or for any other reason.

**About courses**

A course is defined by the Academic Board as

*a component of an academic program, normally of one term or semester in duration, with a specific credit value.* Each approved course of the University is identified by a sequence of eight characters, consisting of a four character alphabetical prefix which identifies the organisational unit responsible for administering the course, and a four digit numeric suffix which identifies the course. Each course has a unit of credit value defined.

Course identifiers are approved by the Deputy Vice-Chancellor Academic and the system of allocation is based on the following guidelines:

1. A four character alphabetical prefix is used to indicate the subject area. This usually correlates with the authority offering the course (normally a School of the University), but in some cases identifies subject specialisations or cross-disciplinary subject areas.

2. Each course identifier is unique and is not used for more than one course title.

Courses offered are listed and described in the *Handbook*. The subject areas and organisational units for each identifying alphabetical prefix are also described in the Specialisations section of the Handbook.
